### **DETAILED ACTION**

1. Claims 1-12 are allowed.

### **REASONS FOR ALLOWANCE**

2. The following is an examiner's statement of reasons for allowance:

JP-08221151-A to Morita teaches generating a plurality of clocks wherein one of the clocks is output to a CPU and also divided into a second plurality of clocks and applies one of the second plurality of clocks is supplied to a peripheral device [abstract].

JP-10232853-A to Hashiguchi teaches generating a plurality of clocks, which can be selectively stopped, and a means to selectively output the clocks [abstract].

JP-A-2000-242358 to Shibazaki teaches dividing a clock into a plurality of different clock signals and selecting one of the divided clock signals for output [abstract].

JP-A-2001-325244 to Hideo<sup>1</sup> teaches a CPU having information on the frequency of a clock signal and converting a clock signal into a baud-rate clock to be used with a peripheral device [¶'s 0038-0044 of Hideo<sup>2</sup> and page 1 of the specification in the present application].

The prior art of record does not teach or suggest individually or in combination a clock halt portion outputting one of a plurality of received clock signals and selectively activating a timer only when receiving the one of the plurality of received clock signals being output.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
